Frequently Asked Questions	

Introduction

This User Guide has been designed to assist users who are installing and activating software license keys for a Visual Components product.

System requirements

The updated system requirements for using a Visual Components product, can be found at: https://www.visualcomponents.com/system-requirements/

Installation Requirements

For a successful installation you will need:

- Visual Components product installer
- Software license key

A software license key can only be activated for a specified product and version. We recommend that prior to installation, you confirm for which product and version your license key is intended.

Installation

To install Visual Components, you will first need to visit visualcomponents.com/downloads/ to download the installer for your product and version.

Installing Visual Components

1. Begin by running the installer and from the Setup Wizard dialog click Next.

Visual Components Premium Setup			
	Cor Set The Se	Icome to the Visual mponents Premium up Wizard	
		ur computer. Click "Next" to continue or "Cancel le Setup Wizard.	" to
		< Back Next > Ca	ancel

2. In the End-User License Agreement dialog, read and accept the terms, then click Next.

3. Review the privacy policy and click Next.

5. Then click Install.

6. Then click Finish.

Note: Uncheck the *Launch* application option if you do not wish to launch the application right away.

Uninstall or Change Visual Components

Begin for example by launching the Windows Control Panel and access the **Uninstall a program** options.

Change

1. In the Uninstall or change a program panel, select the Visual Components product you wish to remove, then click Change.

- 2. Then from the *Setup Wizard* dialog click **Next**.
- 3. In the Modify, Repair or Remove installation dialog, you may select the following options:
 - Select **Modify** to enable or disable application features. See installing Features.
 - Select **Repair** to repair the application. This process reinstalls the application to replace any missing files.
 - Select **Remove** to remove the application and files. See **Remove Visual Components**.

🐯 Visual Components	Premium Setup	×

4. In the Setup Wizard dialog, click Finish.

関 Visual Components Premi	um Setup	×
	Completing the Visual Components Premium Setup Wizard Click the "Finish" button to exit the Setup Wizard.	
	< Back Finish Cance	

Uninstall

1. In the Uninstall or change a program panel, select the Visual Components product you wish to remove, then click Uninstall.

2. In the Setup Wizard dialog, click Next.

- 3. In the Remove Visual Components dialog, you may select the following options:
 - Select Deactivate License to deactivate any license keys for this product that are currently active on your device.
 Note: We recommend deactivation of a product license key during uninstallation, to avoid possible future issues when re-installing the software on a different computer.
 - Select Remove configuration and log files to remove these files from the following example directory: C:\Users\UserName\AppData\Local\Visual Components\Visual Components Premium X.X
 - Select Remove eCat files to remove eCatalog files from the following directory: C:\Users\Public\Documents\Visual Components\X.X\Models
 Note: This process does not affect any data in your *My Models* folder. For example in the following directory:

C:\Users\UserName\Documents\Visual Components\X.X

Then click Remove.

Visual Components Premium Setup	<]

4. In the Setup Wizard dialog, click Finish.

Licensing

The first time you run a Visual Components application, you will be prompted to provide either a standalone software license key, or the address to a Visual Components Network License Server. Refer to the Commercial License section for more information.

Note: Your computer and network must allow traffic from Visual Components software, so you may need to modify your firewall settings. For more information, refer to the Frequently Asked Questions section.

Evaluation license

Evaluation licenses are software license keys with a specific number of activation days. Once activated on a standalone computer system, they cannot be deactivated, nor can they be transferred to another system.

Activation of the evaluation license, will expire automatically after the specified number of activation days. After the evaluation period, the user is required to purchase a Commercial License to continue using the Visual Components product.

- **1.** To start your evaluation period, visit visualcomponents.com/downloads/ to download the installer for your product and version. Then install your Visual Components application and activate your evaluation license key.
- When starting your application, from the Evaluation License dialog, you can either choose Upgrade or Evaluate to continue using the software within the evaluation period.
 Note: You can use this dialog to track how many days remain of your evaluation period.

Visual Components Premium	
VISUAL COMPONENTS	Evaluation license
	Thank you for evaluating Visual Components Premium
	Your evaluation license will expire in 30 days.
	If you wish to continue evaluation, click 'Evaluate'. If you have a valid license key or access to a network floating license server, you can set it now by clicking 'Upgrade'. For information how to buy a license contact 'Visual Components' dealer clicking 'Contact'. Contact
	Cancel < Back Upgrade Evaluate

3. To upgrade during the evaluation period, select the **FILE** tab to access the Backstage view, then select **Info** and **License**.

4. And from the Application License tab click Upgrade.

Commercial license

A commercial license is either a time limited or perpetual license key, that can be found in your shipping note.

Commercial License key types

License keys are available for the following Visual Components products:

- Visual Components Premium
- Visual Components Professional
- Visual Components Essentials
- Visual Components Premium OLP
- Visual Components Professional OLP
- Visual Components Robotics OLP

Note: Any references to "Robotics OLP" in this user guide, refers to all three OLP products listed above, as part of the Visual Components Robotics OLP family of products.

Standalone product key

Online Activation

To use your commercial product key to activate a Visual Components product, follow these steps:

- 1. Run your Visual Components application.
- 2. On the Welcome dialog, click Next.

Visual Components Premium	
VISUAL COMPONENTS	Welcome to Visual Components Premium
	Thank you for installing Visual Components Premium
	Cancel < Back Next > Finish

3. On the License type dialog, select I have a standalone product key, and then click Next.

4. In the Standalone license dialog, enter your 16-digit product key, and then click Next. Note: If you have a license key that includes Robotics OLP, some features will be available to enable in the Backstage view. Refer to the Enable Robotics OLP section for more information.

Visual Components Premium

NOTE! Registration requires an active Internet connection and the password you create must be at least eight characters in length and include the following:

- At least one lower case letter.
- At least one upper case letter.
- At least one special character.
- At least one number.
- 7. Once you have registered your product, you can use the account to manage your software licenses online in the Customer Portal at license.visualcomponents.net and request customer support at support.visualcomponents.com.
- 8. Click Finish to complete licensing.

Robotics Solver Add-on Activation

To activate a Visual Components Robotics Solver Add-on license key, you should also have a license key for one of the following products:

- Visual Components Premium OLP
- Visual Components Professional OLP
- Visual Components Robotics OLP

Note: A Robotics OLP product will enable OLP features in the **PROGRAM** and **PAINT** tabs, including the **Path Check** Panel. Activating the additional Robotics Solver Add-on License enables three buttons in the **Path Check** Panel, and some additional settings that are only available when using the Robotics Solver Add-on.

Deactivation limit/Transfer limit

A perpetual standalone software license key can be activated and deactivated up to 3 times during a 30-day period. This transfer limit is defined in our End User License Agreement (EULA). Once this limit is reached, the date on which the next transfer is possible will be displayed in an error message.

If there is a requirement to transfer a key more than 3 times in a month, you will need to upgrade to a Network License. Contact your Sales Representative to upgrade from a standalone to a Network License Key.

If you have Registered your product key, you can check the activation history of your software licenses online in the Customer Portal at license.visualcomponents.net.

1. To view the activation history of an individual license, from the **My Product Keys** page click on the **Product Key** link.

2. Then in the Details page for that specific Product Key, you can examine its Activation history.

Note: Network License keys are not visible through the Customer Portal.

Activation renewal

- A standalone license is activated for example, for 90 days.
- Upon expiration of the current activation period, the product key will attempt to automatically re-activate when you launch the application.
- This requires your computer to be connected to the internet.
- If online renewal fails, you will receive a notification that asks you to renew the license manually.

To view the renewal date of your active License, select the **FILE** tab to access the Backstage view, then select **Info** and **License**. And under **Project License Settings** refer to the **Online renewal date**.

Network License

Management of Network License keys for Visual Components, is managed by the Visual Components License Server Management Console, that is installed on a centralized server PC inside an organization's network. And a client PC needs to be inside the same network, to access a Visual Components product using a Network License key.

To download the Visual Components License Server Management Console and the User Guide, see the Network License Server section of downloads page at visualcomponents.com/downloads/.

Online Activation

To activate a Network License, your License Admin should already have setup a Network License Server.

Note: For information on setting up your License Admin, refer to the Upgrade License section below

- To install the Network License Server application, download the installer from visualcomponents.com/downloads/.
- To manage Network Licenses, refer to the Network License Server User Guide, available from visualcomponents.com/downloads/.

• To configure your network to support a Network License Server refer to the Frequently Asked Questions section of this document.

Using a Network License Key

To use your Network License key to activate a Visual Components product, follow these steps:

- 1. Run your Visual Components application.
- 2. In the *Welcome* dialog, click Next.

Visual Components Premium	
VISUAL COMPONENTS	Welcome to Visual Components Premium
	Thank you for installing Visual Components Premium . Activation is required to authenticate this product. This wizard will guide you through the activation process.
	Cancel < Back Next > Finish

3. In the **License type** dialog, select *My organization is using network floating license server*, then click **Next**.

Visual Components Premium	
License type Please specify if you are using a standalone or a floating license:	
I have a standalone product key

Cancel	< Back Next > Finish

5. Click Finish to complete the Network license setup.

Changing the Network License Server address.

When you have activated a Visual Components product using a Network License key and the address of your Network License Server changes, to modify it follow the steps below:

- 1. Run your Visual Components application.
- 2. Select the FILE tab to access the Backstage view, then select Info and License.
- 3. And in the Application License tab, under Floating License Settings click Change.

\bigcirc		
Clear All	Info	
Open	Layout	😔 View and manage license

- **4.** In the **Floating license server settings** dialog, modify your *Floating network license server host name or IP address (without http prefix)* and keep the *Floating network license server port #* as 5093 (if not modified in the Network License Server), then click **Next**.
- 5. Click Finish to complete the setup.

Borrowing a Network License Key for offline use.

When you have activated a Visual Components product using a Network License key and you wish to borrow a license from a Network License Server for an amount of days to work offline, and then check back in the license, follow the steps below:

- **1.** Run your Visual Components application.
- 2. Select the FILE tab to access the Backstage view, then select Info and License.
- **3.** And in the **Application License** tab, under **Floating License Settings**, to check out a license under **Borrowing options**, set the **Duration** of days for checking out a license.
- 4. Then click Borrow license from server.

6. Then to return a license, click Return license to server.

Manual Activation

For instructions on how to manually activate your Network License, refer to page 14 of the Network License Server User Guide available here.

Deactivation

To deactivate a Network License refer to pages 15 and 16 of the Network License Server User Guide available here.

Activation renewal

To renew a Network License refer to page 17 of the Network License Server User Guide available here.

Upgrade License

Software license upgrades require a designated License Admin User. The License Admin is a first point of contact and the only person in your organization entitled to request version upgrades.

- You only need to register a License Admin once.
- Only one License Admin User per company can be registered.
- You must provide a valid email address for the License Admin.
- To register a License Admin User, please submit a request at visualcomponents.com/license-management

When upgrading your software license(s) please note the following:

- A new software license key is required to install and activate Visual Components 4.8. And you can upgrade your current license free of charge if you have a valid maintenance contract.
- A Visual Components product key can only be used for the specified version. For example, a 4.8 Premium product key can be used only for Visual Components Premium 4.8. Therefore, every version needs a separate product key.
- Users with valid maintenance, can upgrade to the latest version for free, for example VC Product¹ 4.0/4.1/4.2 to VC Product 4.8.
- To request an upgrade your License Admin should submit a request at visualcomponents.com/upgrade-license/
- Upgrade requests are validated and upgraded keys will be delivered to the registered License Admin User only.
- Requests will be answered within 2 working days.
- Please note when upgrading to the new version, your old perpetual keys will become inactive after 90 days, and time-limited keys will become inactive after 30 days.
- Before upgrading license keys, the Admin User should check that their Network License Server installation is up to date. To install the latest version of the Network License Server application, see the Network License Server section of downloads page at visualcomponents.com/downloads/.

¹ VC Product refers to Visual Components Essentials/Visual Components Professional/Visual Components Premium application.

Command line deployment

A command line interface can be used to deploy Visual Components product.

Command line deployment

The installer consists of an EXE bootstrapper that launches an MSI installer. The EXE bootstrapper supports some command-line options which can be found by running the installer with the following parameter:

/help

Additionally, the installer supports all msiexec command-line options (all command-line parameters you can use for an MSI package). A command-line received by the EXE bootstrapper will be passed to msiexec when launching the main MSI.

Command-line switches order

When passing proprietary command-line parameters to an EXE setup, you cannot mix them with the standard MSI parameters. The correct order is to first specify the proprietary EXE switches and then the standard MSI switches.

For example, a correct command-line would be:

VisualComponents.exe /exenoui /qn /norestart

Where /exenoui is an EXE parameter and /qn, /norestart are MSI parameters.

Fully silent installation

Two parameters are required for a silent installation where no UI (User Interface) is shown to the user. A third parameter for not restarting the PC after installation is optional. Note that the order of the parameters should be as in the usage example below:

/exenoui - (needs to be passed before MSI parameters).

/qn - no UI is shown.

/norestart - the machine will not be restarted when the installation is complete.

Usage example:

VisualComponents.exe /exenoui /qn /norestart

Alternative options for showing some UI during installation

/quiet - quiet mode displays the installer UI but does not require user interaction.

/passive - displays only the installation progress bar, does not require user interaction.

When installing it is possible to exclude features as listed in the Features section. To exclude specific features the following parameters can be used comma separated inside a REMOVE=""" command.

vcm - exclude the .vcm File Type Association

vcmx - exclude the .vcmx File Type Association

KUKA.OLP - exclude the KUKA.Sim AddOn

Doosan - exclude the KUKA.Sim AddOn

Usage example:

VisualComponents.exe /quiet ADDLOCAL=ALL REMOVE="vcm,vcmx,KUKA.OLP,Doosan"

Restart Options

/norestart - the machine will not be restarted when the installation is complete.

/promptrestart - the user will be prompted if a restart is required.

/force - restart the machine will be restarted when the installation is complete.

Custom Installation Path

APPDIR=" " - Specify the desired installation path by passing the path string between the quotation marks.

Usage example:

VisualComponents.exe /exenoui /qn APPDIR="C:\Program Files\MyFolder"

Uninstallation

/uninstallinst <Product Instance> - uninstalls an instance of the product.

Usage example:

VisualComponents.exe /x // /qn

UNINSTALL_DEACTIVATE_LICENSE=1 - deactivates active license during uninstallation

Usage example:

VisualComponents.exe /uninstallinst "Visual Components Premium 4.10.0" /qn
UNINSTALL_DEACTIVATE_LICENSE=1

```
UNINSTALL_LOCAL_APPLICATION_DATA - uninstalls files and folders found in the following directory C:\Users\UserName\AppData\Local
```

Usage example:

VisualComponents.exe /uninstallinst "Visual Components Premium 4.10.0" /qn
UNINSTALL_LOCAL_APPLICATION_DATA=1

UNINSTALL_PUBLIC_DOCUMENTS - Uninstalls files and folders found in

C:\Users\Public\Documents.

Usage example:

VisualComponents.exe /uninstallinst "Visual Components Premium 4.10.0" /qn UNINSTALL_PUBLIC_DOCUMENTS=1

License settings

To prefill license information (license key or floating license information) the following parameters can be used where PRODUCT_LICENSE_SETTINGS allows setting three values separated by a vertical bar "|" symbol:

```
"{license key}|{floating license server ip or host}|{ floating license server port}"
```

Usage example:

```
VisualComponents.exe /exenoui /qn PRODUCT_LICENSE_SETTINGS="VCP49-XXXX-XXXX-
X"|Network_Server|5093"
```

Frequently Asked Questions

- Do I need to configure a firewall on my network to access Visual Components Network License Server?
 - a. Network Access: Firewall needs to be configured to allow UDP traffic on the chosen port (default is 5093).
 - b. Internet Access: Access to the Internet (HTTPS) is required on the server for automatic license activation.

Additionally:

- c. Every client needs to be able to access the local network server through the defined access point to use Visual Components products with network licenses.
- d. Distributing network licenses over the Internet is explicitly not supported by the network license server as stated in the End User License Agreement (EULA) for Visual Components products.
- How do I create a Visual Components Customer Account that I can use to register my software license keys?
 - a. You can create a Customer Account using Visual Components software, refer to the Register Product Key section.
 - b. Or you can create a Customer Account online through the Visual Components Customer Portal at license.visualcomponents.net.

Should any user still require assistance, then please contact Visual Components Support via email at support@visualcomponents.com
