Network License Server Release Notes

Release version: 2.1.2

Release date:
24.10.2023

What's New in this Release:

Improvements

ID	Description
16143	Setting to allow ungrouped clients to use unreserved seats in group-based access control
25487	Key status is changed to "Renewal needed" instead of "Activation expired" when key needs to be renewed

Bug Fixes

ID	Description
22191	Fixed an issue where clients were automatically added to the direct membership list when they were included through an IP address range.
23244	Fixed an error in installing license server when updating from a previous version.
24164	Fixed an issue where existing keys were not correctly shown after an upgrade from a previous version.
24541	Fixed an issue where the automatic renewal stopped working if a key was renewed within 14 days of its renewal date and no other license operations occur until the new renewal date passes.
24968	Improved automatic recovery when the license data file corrupts for any reason.
